ECLIPSE ARCHITECTURAL

IMAGINE...

an opening in your wall without sliding doors. Your inside becomes the outside in one continuous space. You can entertain without interruption and your views become vistas. No fixed glass panels and no mullions or posts; just wide open space. Eclipse Folding Door Systems from Eclipse Architectural combine contemporary design with sleek lines for very aesthetic door systems, available in wood, aluminum or pvc. Designed for structural performance, versatility and value, our systems feature concealed Multi-point locks on the active door and our new Twinpoint locking system is used to secure each pair of doors. Eclipse systems can accommodate up to 8 panels in each direction for a total of 16 panels equalling up to 52 ft. wide and up to 10 ft. high. The panels can accommodate any glass spec and the frame and panel color options are endless. The Eclipse Systems feature self-draining sills and have been tested and meet AAMA performance standards.

Eclipse Architectural is part of the DS Group of companies, which also include DraftSeal, KrisTrack & DSD Hardware. Eclipse Architectural is a supplier and manufacturer of exterior folding door components which include hardware, sill and track systems for the custom door industry. Eclipse Architectural also produces its own line of aluminum or pvc exterior folding door systems.
